

THE SCIENCE OF PERSONOLOGY

Business Seminars

Seminar #1: "The Secrets of Body Language"

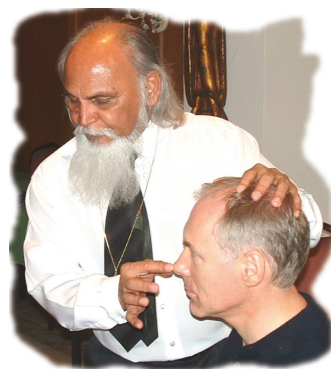

Body Language is the study of unconscious human behaviour, in that habitual attitudes indicate predictable performance. Understanding this will help you stay a step ahead of the competition, with a clear and precise awareness of your communication messages.

The seminar includes:

- Training to use dynamic movement, gestures and voice tone.
- Observation of habitual behaviour that indicates mental and emotional attitudes.
- Ways to use facial expressions and props to convey congruent messages.
- Development of clear and precise awareness of yourself to achieve your objectives.
- The awareness of what your whole body mind is demonstrating to you and others.

Research shows that approximately:
• 60% of communication is through Body Language
• 33% is through sound, inflection and tone of voice
• words carry a mere 7% of the total impact of your message

"This Universal Language unconsciously demonstrates our true feelings and reactions to one another."

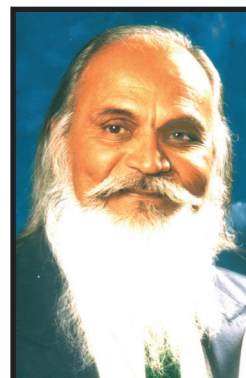

Seminar #2: "Profiling Personality Potential"

Come 'Face to Face with Facts' and understand the potential characteristics in a face. Your personality is your life history and is portrayed in your facial characteristics. Personality profiling provides you with the skills and knowledge to have a deeper understanding of why you and others behave in a "certain way".

The seminar includes:

- How to combine and coordinate the key features in a face to understand its personality.
- Recognizing the structure and shape of the face and evaluating its potential for performance.
- Recognition of how the frontal view can differ from the projection of the person in profile.
- Left/right imbalances in facial features indicate a similar imbalance in mental/emotional reactions.
- How to use this understanding to develop your leadership skills.
- How to create profiles of personnel for specific tasks and roles.

"Keep in step with the fast pace of change to give you the leading edge in every transaction."

Professional and Personal Growth Courses

Module 1: "The Art of Reading Faces"

The Face is the autobiography of life. It is exciting beyond words to look into a person's face with complete understanding and recognize their Soul and personality for who they truly are. This unique experience will keep you a step ahead in your understanding of others in relationships, business or just getting to know yourself.

You will understand how:

- Structure indicates potential for performance.
- Each individual feature or part speaks a unique language of its own.
- The cheeks, cheekbones, lips and jaw all express who you really are.
- The eyes are a point of view while the nose 'knows' your personality.
- The forehead indicates your frame of mind through which you perceive the world.

"Your world will be changed forever as you recognize people with depth and understanding."

Module 2: "Body Mind Analysis"

Create radical change in your life by taking conscious responsibility through awareness of 'the shape you are in'. This workshop is a therapy in itself, designed to release tensions and create in-depth healing in mental, emotional and physical states.

Here is just a portion of what you will learn:

- To release cellular memory and redundant habits.
- How breathing patterns release stress and cellular memory.
- Posture and body language determine your attitude in life.
- To balance the male-female energy and left/right brain responses.
- The flow of energy through the body's major centres determines your health and fitness.

"The Issues are in the tissues."

Module 3: "The Language of the Hands"

The sense of touch is the finest form of emotional and mental expression and experience of love. The healing power of your hands and the delicate instrumentation of the fingers give life dimension and shape.

You will discover the deeper meaning of touch:

- By listening and feeling inside whatever you touch outside.
- That great character and potential lies 'on the tips of your fingers'.
- That your hands are the most sensory communicators you have.
- By understanding each digit of each finger and its part in the expression of your life.

"Your fingerprints are so unique, everything you touch and feel in this world will carry your signature."

Module 4: "Emotional Anatomy"

Modules 1 - 3 are pre-requisites for modules 4 and 5

Anatomical structure is the blueprint that supports the expression of our experiences of life. The internal pulsation of life that maintains this structure and the organs is eventually expressed outside as psychosomatic attitudes and behaviour that grow into belief systems. These are rationalized as emotional and mental states. Our internal relationships then determine our performance, self-image and our interaction with others and the issues of life itself.

You will discover:

- How structure creates psychological function.
- How interaction and relationships are effected by habitual behaviour.
- Somatic education & clinical direction, enabling you to release the past.
- The practical experience of 'Emotional Release Points' on the physical body.

"New experiences are surprisingly refreshing."

Module 1 is available on DVD or VHS

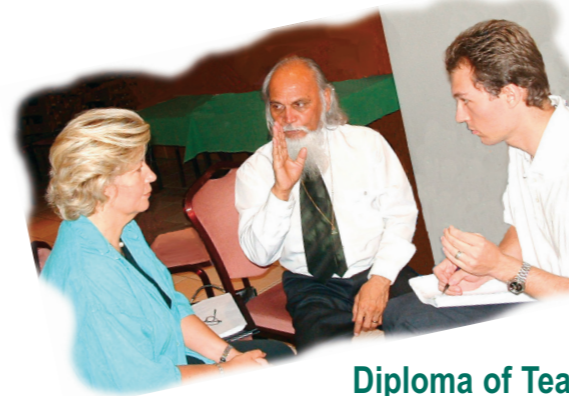

Module 5: "Psychosomatic Practitioner" Certificate III

Experience the combination of Psychotherapy and Quantum Physics, and learn how the Neuro Linguistic programming of old core belief patterns can be released and replaced by balance, posture and muscle toning.

The Certification requirements include:

- A practical analysis and report of your client.
- Fine tuning of your work to recognize subtle messages.
- Observe your client's total history, as it stands before you.
- Recommend appropriate treatment and practices for change.
- Experience the profound changes that occur during and after the session and the subtle release of past conditioning from the unconscious.

"Experience the true potential of who you are. What a tool for self-confidence!"
